Compost machine for installation at Anushakti Abasan

As a part of long term planning, a compost machine has been procured and will be commissioned shortly inside Anushakti Abasan for reduction of solid waste accumulated from the kitchens of the residents of the complex. Decision has been taken to construct a pathway around the boundary walls of the complex wherever possible to create a jogging facility for the residents. Lighting, construction of flower beds and installation of big flower pots besides the pathway will be made for growing seasonal flowers as well as other small trees for beautification of the residential complex. Renovation work of boundary wall fencing, creating space for car parking, fencing of children play ground and making permanent sheds for the security personnel posted in Anushakti Abasan main gates have been taken up for beautification and cleanliness of the complex.

Report is prepared by Shri Tapas Kumar Bhaumik, Convenor/Secretary, Swachhata Committee, VECC, Kolkata
